ПОДГОТОВКА НА ПОВЪРХНОСТТА

НАЧИН НА УПОТРЕБА

Stir thoroughly prior to use. The first coat can be diluted with a maximum of 5% water. Apply in 1 or 2 coats using a suitable brush, paint roller or paint sprayer. For optimal cleanability, apply 2 coats. To avoid visible marks, always work wet-on-wet and distribute the paint evenly. Back-roll all overlaps in the same direction. Do not touch up when drying. Very easy to touch up after drying.

ПОЧИСТВАНЕ НА ОБОРУДВАНЕ И РАЗЛИВИ

Optimal cleanability when fully cured after 30 days. The most common types of dirt are easily and effectively removed with clean, lukewarm water, possibly in combination with a mild detergent. Use a sponge or soft, non-abrasive and lint-free cloth (not a microfibre cloth). No special cleaning products are required.

ЗАБЕЛЕЖКИ

Variations in coating thickness, temperature, humidity, etc. affect the drying time. Roller marks are more likely to happen with dark colors due to the absorption of light which highlights surface defects. To prevent this, prefer application by spraying.
